PHAZAR ANTENNA CORP. DEVELOPS MULTIBAND ANTENNA FOR DAS (DISTRIBUTED ANTENNA SYSTEMS) APPLICATIONS

PHAZAR CORP, (Nasdaq: ANTP) announced today that Phazar Antenna Corp. in Mineral Wells, Texas, a wholly owned subsidiary, has recently received several purchase orders from “Neutral Hosts” for its new Quad Omni-Directional antenna developed as an integral component of DAS (Distributed Antenna Systems) for shared carrier markets in several locations in the United States. The antennas, which are installed on utility poles, street lights, buildings or monopole structures, will enhance carrier voice quality and improve mobile coverage in areas that standard base station antennas do not adequately cover or offer expanded capacity for public safety at universities or special event locations. Phazar Antenna Corp.’s unique design allows the antennas to cover a wide band-width from 698 to 940 MHz and 1710 to 2155 MHz. The antennas are offered in Quad (four antennas in one radome) or Dual (two antennas in one radome) configurations with special mounting hardware for various applications. The antennas will be manufactured at Antenna Products Corporation’s plant in Mineral Wells, Texas.

Product information is available at www.antennaproducts.com, www.truemeshnetworks.com and www.phazar.com.
