### PHAZAR CORP ANNOUNCES NEW RAPID TRANSIT SYSTEM ANTENNAS

PHAZAR CORP, (Nasdaq: ANTP) announced early today the addition of four new mobile directional antennas to the ISM (instrument scientific medical) antenna product line. The ISM antennas have been qualified as key components in the automatic train control systems used to operate automated rapid transit systems, monorails and people movers for urban and airport applications. The antennas have been successfully deployed with the automated people mover system that connects the remote parking areas, rental car facilities and airline terminals at DFW International Airport and San Francisco International Airport. PHAZAR CORP will provide the transit system antennas for the longest driverless airport people mover in Europe in 2006. This automated system will transport passengers over two kilometers between a new terminal and a new satellite terminal at Barajas International Airport in Madrid, Spain. PHAZAR CORP will also provide the transit system antennas for the first driverless transit system in South Korea. The EverLine Rapid Transit System in Yongin City, Republic of Korea. The EverLine RTS will serve 15 stations, linking the Seoul Metropolitan subway, via Yongin City, and will terminate in the Everland area, one of the world's largest amusement parks.

Information on PHAZAR CORP is available on the Internet web page at [www.phazar.com](http://www.phazar.com) and at [www.antennaproducts.com](http://www.antennaproducts.com).
